

# What a lot of kettles!

## Een Engels versje

Een kettle is een ketel, bijvoorbeeld voor het maken van thee. Ze zijn er in alle soorten en maten. Kijk maar!

A kettle on the shelf,

There's an old kind of kettle

On the cooker by itself.

There's a kettle with a whistle,

There are lots with plugs,

There's a kettle that is mother

To a matching pair of mugs.

There's a kettle that is yellow,

A kettle that is green,

There's a kettle that is metal

And the shiniest I've seen.

There are kettles in the kitchen

Where kettles ought to be,

But the kettle in the garden

Is a mystery to me!

Whoever threw it out there

They did it for the best:

Although the kettle's rusty

It is now a robin's nest.
